

#313

Jello

Jello is the urban space element that's hard to pigeonhole—quite literally. This sculptural piece unites a sturdy bollard, resting place, gathering point, and bike rack into one multifunctional unit, adding modern dynamism and flexibility to urban spaces

#313

Jello

Technical data

Material

Moulded white/grey/anthracite wet concrete. Resists wear and weather. Fibrous concrete is a dynamic material. Minor, cosmetic cracks may occur over time. Reinforced with stainless steel to strengthen the legs. Top plate made from stainless steel.

Dimensions

Ø1165 x 706mm.

Bike function

Up to 11 bikes can be placed in the slits. An installation with Jello and 11 bikes reaches a diameter of max. 4m.

Fixation

Directly positioned on the ground. No fixation needed due to its weight of 400kg.

Variant

Available in grey and anthracite concrete.

Also available as an integrated solar cell lighting version (#314).

Maintenance

Maintenance-free

To ensure easy removal of dirt and graffiti it is recommended to give the surface an anti-graffiti treatment which is offered as supplement.

Design Protection
