

#325

Chicane

Chicane concrete bollard is created in an elliptical cone, which is ideal for installation in patterns and repeated formations to achieve access restriction. When hit, Chicane will fall over, but its shape will prevent it from rolling and wedge the bollard under the vehicle. The bollard is easy to set up and move due to a built-in- lifting option at the top or recesses at the bottom

Chicane

Technical data

Materials

Moulded white/black/grey poured, armoured concrete. Highly durable and weather-resistant.

Concrete is a dynamic material. Minor shrinkage cracks may occur over time.

Dimensions

Ø340/670-1020 x 1200 mm. Seating height 550 mm.

Mounting

Positions directly on the ground. M16 thread on top. Weight of 730 kg. eliminates the need for mounting.

Maintenance

Maintenance-free. We recommend anti-graffiti coating to ensure easy removal of dirt and tags.

Variants

Available in white, grey or black concrete – or dyed to client specifications. Also available with forklift hollows on the bottom of each unit.

Accessories

M16 steel eyebolts, stainless steel or painted red. To be ordered separately.
